Connecticut's wooden nutmeg must now give way to New York's stone pota-to. In the particular field of furnishing this strange and adamantine vegetable, this city, it is asserted on good author-ity, leads the world. The stone potato, it should be understood, is not a new breakfast food, but in the small city markets where real potatoes are writes where real potatoes are writes where real potatoes are by the pound it is a source of much profit to unscrupulous vegetable dealers.

One of these stone tubers adds weight in a manner calculated to rapidly enrich those selling them. The article itself, so large has the trade grown, is made from plaster of paris and colored properly.

Fortunately, however, they cannot be eaten, a fact which makes them less destend the same happy results follow in all debility. Weak, puny children too, are greatly strengthened by them. Persons who have suffered from these crooked prac-tices assert that the gutta percha beef-steak may be shortly expected.

Most of New York craned its neck this week when Ernest Capells received \$1000 for setting up one high ball in public. It was not of the alcoholic variety, however, but the one on the top of the flagpole crowning the 42-story Singer building on lower Broadway, more than 700 feet above the street level. Likewise Capelle is not a bartender but a steeple jack, and by reason of his feat in finish-ing off the tallest habitable structure in the world, the leader of his profession, the world, the leader of his profession, though little more than a boy. The feat for which he received \$1000 and which was watched by thousands consisted of shining up the steel flagpole which swayed like a reed under his weight, and crowning the remarkable structure with a gilded ball, which now marks the highest point reached by skyscraping architects.

Curiously enough, Capelle who went about his perilous task with the utmost coolness, did not look like a fly to the gaping multitude below but like a full-

Perhaps the strangest feature of the wholly undertaking was the fact that Capelle had to give bonds to the city not to fall on anybody, although as he remarked it wouldn't make much difference to him it had it. ence to him if he did.
